

Install Instructions Windows XP

- 1.) Move the "Galbanum Architecture" folder to

`C:\Program Files\Cakewalk\Rapture\Multisamples\`

- 2.) Move the "Galbanum Piscis" folder to

`C:\Documents and Settings\All Users\Application Data\Cakewalk\Rapture\Programs\`

- 3.) Move **the contents** of the "Lfo Waveforms" folder to

`C:\Program Files\Cakewalk\Rapture\LFO Waveforms\`

(First move/copy/backup existing LFO files if desired, or overwrite the existing files if not.)
(Note case differences between OSX and Windows.)

- 4.) Delete the following file if it exists on your hard drive:

`C:\Documents and Settings\All Users\Application Data\Cakewalk\Rapture\Programs\programs.lst`

- 5.) Launch Rapture and press "F5". This will make Rapture re-scan its Program folder and import the "Galbanum Piscis" presets into Rapture's pop-up Program list.

(This recreates the file that was deleted in step 4.)

Install Instructions Mac OSX

- 1.) Move the "Galbanum Architecture" to

`\Library\Audio\Plug-Ins\Rapture Content\`

- 2.) Move the "Galbanum Piscis" folder to

`\Library\Audio\Plug-Ins\Rapture Content\Programs\`

- 3.) Move **the contents** of the "Lfo Waveforms" folder to

`\Library\Audio\Plug-Ins\Rapture Content\Lfo Waveforms\`

(First move/copy/backup existing LFO files if desired, or overwrite the existing files if not.)
(Note case differences between OSX and Windows.)

- 4.) Delete the following file if it exists on your hard drive:

`\Library\Audio\Plug-Ins\Rapture Content\Programs\programs.lst`

- 5.) Launch Rapture and press "F5". This will make Rapture re-scan its Program folder and import the "Galbanum Piscis" presets into Rapture's pop-up Program list.

(This recreates the file that was deleted in step 4.)
